DETAILED ACTION

Request Continuation Examination

1. The request filed on 2/28/2005 for a Request Continuation Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/635,775 is acceptable and a RCE has been established. An action on the RCE follows.

Allowable Subject Matter

2. Claims 52-113 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 52-63 and 85-92, the prior art alone or in combination does not teach the limitation of a charge storage device comprising a charge storage cell having the volumetric FOM (Figure of Merit) of the device being greater than about 3.2 Watts/cm³ or greater than about 35 Watts/cm³, and the maximum operating voltage of the cell being less than about 4 Volts.

With respect to claims 64-73, the prior art alone or in combination does not teach the limitation of a charge storage device comprising a charge storage cell including: a first electrode having a first layer including a carbon having a surface area greater than 400 m²/gram, a second electrode having a second layer including a carbon having a surface area greater than 400 m²/gram opposed and spaced apart within a sealed package, wherein the volumetric FOM (Figure of Merit) of the device being greater than about 1.1 Watts/cm³ and the maximum operating voltage of the cell being less than about 4 Volts.

Application/Control Number: 10/635,775

Art Unit: 2831

With respect to claims 74-84 and 102-113, the prior art alone or in combination does not teach the limitation of a charge storage device comprising a charge storage cell having the gravimetric power maximum of the device being greater than about 12.5 Watts/gram or greater than about 2.1 Watts/gram, and the maximum operating voltage of the cell being less than about 4 Volts.

With respect to claims 93-101, the prior art alone or in combination does not teach the limitation of a charge storage device comprising a charge storage cell including: a first electrode having a first layer including a carbon having a surface area greater than 400 m²/gram, a second electrode having a second layer including a carbon having a surface area greater than 400 m²/gram opposed and spaced apart within a sealed package, wherein the gravimetric power maximum of the device being greater than about 4.8 Watts/gram and the maximum operating voltage of the cell being less than bout 4 Volts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T Ha whose telephone number is 571-272-1974. The examiner can normally be reached on Monday-Friday from 8:30AM to 6:00PM.

Application/Control Number: 10/635,775 Page 4

Art Unit: 2831

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
